### **Bordeaux Vintage 1995**

*The summer of 1995 was dry and hot in Bordeaux. There was rain in September, but not enough to dilute the grapes. Merlot, the principal grape in the right bank communities of St.-Emilion and Pomerol, was particularly successful. Merlot ripens earlier than cabernet, which means much of it was less affected by the autumn rain. Our selection is distinctively known for the dark color, the rich flavor and subtle tannic, making it an extraordinary choice..*
